TIPS TO MAKE YOUR DOOR MATCHING EASIER

Bring your door in-store to be matched, or fill out our “Door Matching Specifications” document, providing door swing, hinge prep, hinge locations, door dimensions, and other door specifications

If your measurements are of the frame openings, we will allow for the reveal.

If you have multiple doors in the same order, name or number each door.

Make sure to note any current issues with the existing door, such as incorrect reveal (top or side) or door rubs frame (top or side).

Make sure the existing door frame is square, as match doors will be square. Consider replacing your frame if it is not square.

If the existing door frame is in poor condition or not square, we recommend purchasing a pre-hung door

Let us know if the door will need additional height, such as from changes in flooring.

Keep in mind match doors may need minor adjustments done on-site to properly fit.

Doors need to be installed before painting in order to allow for final adjustments and avoid costly repainting.
